

## Construction Industry - Case Study

“In those circumstances when I need to be in two places at once, I use MobileIPCamViewer so I can monitor what’s going on at the jobsite on my Blackberry Curve. MobileIPCamViewer helps me stay productive and its use allows me to react to situations in a timely fashion.”

- Justin Drenner, Site Superintendent with Caletti Jungsten Construction of Mill Valley, CA.

### Situation and Solution:

Caletti Jungsten Construction Inc, based out of Mill Valley, CA is a renowned and well-respected construction company managing primarily custom home and remodeling projects in Northern California that range from \$250,000 to \$8M. The company has been featured in many well known magazines such as Better Homes and Gardens, Coastal Living, and Sunset Magazine.

His job as superintendent means that Mr. Drenner is managing one or more jobsites miles away from his primary office. Due to his busy schedule and coordinating the work flow at the jobsites, Mr. Drenner spends some time on the road and the use of the MobileIPCamViewer on his Blackberry Curve provides him the opportunity to monitor activity, including a very important function of the cameras at the jobsites, security.

**Phone:** Blackberry Curve

**Camera:** Axis 207

**Result:** “The benefit of using MobileIPCamViewer is, that it makes me productive and react to situations faster”
