**mobiDEOS Mobile IP Camera Viewer V2.0 Supports BlackBerry**

By **Anuradha Shukla**  
 TMCnet Contributing Editor

mobiDEOS recently launched an update of mobilePCamViewer version 2.0, with support for all BlackBerry ( [News](#) - [Alert](#) ) Pearl, BlackBerry Curve, BlackBerry 8800, BlackBerry 8700, and BlackBerry 7200 series smartphones from Research In Motion (RIM). mobiDEOS has also become a member of the BlackBerry ISV Alliance Program.

Thanks to MobilePCamViewer, customers can watch and control (pan, tilt, zoom) security and surveillance video cameras by using their BlackBerry smartphones at any time and from virtually anywhere. This offers greater convenience, peace of mind, and increased value to customers.

mobiDEOS cites the example of Front Range Drywall in Thornton, Colorado, which uses MobilePCamViewer to monitor the main house, with six cameras inside and outside. By using these cameras, the company can verify delivery personnel and vendors with access to the house.

"mobiDEOS is pleased to work with Research In Motion(RIM)," said L. Palasamudram, CEO of mobiDEOS in a statement. The alliance program provides mobiDEOS with technical, marketing and other resources that can help them bring their innovative applications, including MobilePCamViewer, to BlackBerry smartphone customers.

Jeff McDowell, vice president, global alliances at Research In Motion said that value-added applications like MobilePCamViewer help customers enhance flexibility and productivity and exemplify the versatility of the BlackBerry platform.

mobiDEOS adds that MobilePCamViewer seamlessly connects with top brand IP Cameras such as Sony, Panasonic, Axis, Toshiba ( [News](#) - [Alert](#) ), Canon and many more.
