## Dedicated Micros Partners with mobiDEOS to Provide Surveillance Footage over Cellular Phones

CHANTILLY, Va., (June 20, 2008) — Dedicated Micros, part of AD Group, announces its integration with mobiDEOS to deliver video surveillance footage to cell phones.

With MobileIPCamViewer, customers can watch and control cameras connected to Dedicated Micros digital video recorders (DVRs) via their cell phones, without having to be in front of the computer or security control station. This capability is particularly important to applications where security or management personnel cannot always be on-site, such as multi-location retail establishments or businesses.

"The Dedicated Micros/mobiDEOS integration provides end users with another tool to access video surveillance anytime, anywhere," said Mark Provinsal, vice president of marketing and product strategy for Dedicated Micros Inc.

"It is our pleasure to work with Dedicated Micros, we believe it is a great partnership as Dedicated Micros bring a plethora of experience in surveillance technology and we at mobiDEOS bring technology and expertise in cellular and internet world. Together we can solve customers' remote monitoring problems and offer higher ROI," said CEO of mobiDEOS, Inc. Sri Palasamudram.

MobileIPCamViewer is already integrated with major cell phone manufacturers such as Motorola, Nokia, BlackBerry(RIM), Sony-Ericsson, Sanyo, LG, Samsung, and HTC, with support for over 300 different models.

MobileIPCamViewer has been in the market for over two years. It currently operates on carriers including Cingular, Verizon (Blackberry), Sprint/Nextel, Alltel(Blackberry), Embarq, Boost Mobile, SouthernLinc, Qwest, Telus, Rogers, and Orange, as well as through resellers.

### About Dedicated Micros

Dedicated Micros Inc., which supports North and South America, is a wholly owned subsidiary of the UK-based AD Holdings PLC. The company is credited as one of the first to market with general multiplexing technology and digital video technology. Today, Dedicated Micros Inc. is a world leader in the CCTV control industry. Our solution provides robust, dedicated, user-friendly multiplexing hardware with digital or video capability for security surveillance. For more information, visit the Dedicated Micros website at [www.dedicatedmicrosus.com](http://www.dedicatedmicrosus.com).

### About AD Group

AD Group was established in 1997, its primary objective being to create and bring to market leading edge CCTV solutions. The pioneering nature of the Group's products, with the emphasis very much on R&D, has undoubtedly been a critical element in AD's success to date. In 2001 Dedicated Micros became an integral part of AD Group. Since that time all AD companies have been able to take advantage of a shared technology base, offering the potential for flexible CCTV solutions on the ground, in the air and on the move. Members
