MobileCamViewer is Compatible with Microsoft Compliant Windows-based Webcams

Category: Privacy

Published: 03/25/2009, 21:45

Editor: Catalin B

Security Cameras - Easy to Install - Low Price www.intelspy.com Ads by Google

A leader in providing mobile access to video surveillance and remote video camera monitoring, mobiDEOS, has announced that MobileCamViewer is now compatible with all Microsoft compliant Windows-based USB or built in webcams.

At a fraction of the cost-both in dollars and in time-of installing a traditional surveillance system, consumers can now turn their cell phone and their webcam into a surveillance system for their home. Just taking three minutes to download onto your cell phone and it's ready to use, downloading MobileCamViewer is fast and simple-it.

- No need to configure router
- No need to open any ports
- No need for DDNS services
- No need for a static IP

mobiDEOS offers the public an affordable product and service that allows its customers to use the equipment that they probably already own by making MobileCamViewer compatible with webcams.

### Safer Internet for Kids with Unicaresoft

■ In the future, newly developed Dutch software allows parents and children to use the Internet in a safer way. Violence, drugs, porn, gambling or certain shops are filtered out, parents and children can stipulate time, duration and type of Internet activity and agree on the way of checking thanks to the long-awaited program Benzoy, launched by the Dutch company Unicaresoft.
